***Allowable Subject Matter***

3. The following is a statement of reasons for the indication of allowable subject matter.

Claims 41-43 appear to be allowable subject matter. The aforementioned claims appear to be novel and inventive for the following reasons. Regarding Sakamoto et al (US 2003/0137597), the reference allows for the use of an image acquired with a flash and an image acquired without a flash. However, the reference does not allow for the use of multiple images acquired without a flash. Regarding Ejima (US2002/0122133 A1), the reference allows for the use of multiple images, but utilizes variable exposure

times rather than the existence or non-existence of a strobe. None of the referenced materials make use of all the limitations as directly recited in independent claim 41.
